ENABLING INNOVATION IN DECENTRALIZATION

THE PROLOGUE

WHAT ARE BLOCKCHAINS...?

BLOCKCHAINS - THE FASTEST GROWING TECH OF OUR LIFETIME

In 2016 alone, over 100 banks and leading financial institutions started working on blockchain projects - with the eco-system receiving over US\$1 billion in funding

WHY THE FUSS...? WHAT DO BLOCKCHAINS DO...?

- They provide an **immutable** tamper-proof audit-trail of the truth
- Data can be easily **shared** and independently verified by third-parties
- Vastly increased security that is much less vulnerable to attack or outage
- Programmable contracts that can radically reduce human errors and costs

“While FinTech Disrupts Banks,
the Blockchains Disrupt FinTech”

SOLVING PROBLEMS FACED BY EVERY FIN-TECH PLAYER

- Reconciling Multiple Central Ledgers Vs Auto-Audited Distributed Ledgers?
- Batch Processing CSVs every 24 Hours Vs Really Real-Time Settlement?

ENABLES NEW OPPORTUNITIES IN DIFFERENT INDUSTRIES

BANKING

From AML & KYC cost reductions to reward schemes & reaching the unbanked or general key-signing

HEALTHCARE

Complete and immutable family histories of every related diagnosis and condition available from one key

ACCOUNTING

Creation of programmable processes and automated auditing trails that increase transparency and efficiency

LEGAL

Cryptographically secure document notarization, copyright protection, and dispute settlement

GOVERNANCE

Increase the accountability of public officials and offer total transparency in voting and elections

LOGISTICS

Tracking of shipping cycles and provenance systems that autonomously verify actions

GAMING

Share digital assets between an entire network of games, or use the blockchains to create immutable persistent open-worlds

ASSETS

Track possession of your property in the digital economy by creating, managing, storing, or sharing multiple asset classes

INSURANCE

Integrated insurance and medical services can be intelligently designed to quickly and contractually settle claims with cryptographically

AGNOSTIC PROTOCOLS PROVIDE COMPETITIVE ADVANTAGE

Although they are arguably very different due to their lack of data types (beyond 32 byte limited MD5 hashes - known as data anchoring), Factom and Tierion are our main competitors, but they are only servicing the US & European markets. No Asian competitors.

	FUNDING	DATA TYPES	DATA SOURCE	BLOCKCHAINS
FACTOM	US\$ 1.5M	1	1	1
TIERION	US\$ 1M	1	1	1
CORTEX	US\$200K	20*	3*	10*

* These are merely out-of-the-box support - since everything is either modular in nature or based upon protocols, they all have unlimited scopes

PROBLEMS FACED BY ATA-PLUS AND OUR SOLUTIONS

- ⦿ Difficult to truly include as many retail investors as possible due to 50 limit
- ⦿ Difficult to attract international investors due to current market sentiment
- ⦿ Difficult to actually work in real-time due to offline financial trustee services and daily batch-based CSV transactions with other financial institutions
- ⦿ Having worked with ATA-Plus now for several months, we've been able to:
 - ⦿ Utilize the blockchains to store public data related to our campaign
 - ⦿ Utilize the blockchains to provide an optional digital form of equity
 - ⦿ Utilize the blockchains to develop an ECF loyalty reward platform
 - ⦿ **World's 1st** fully licensed ECF campaign to accept crypto-currency

OTHER BRANDS WE HAVE BEEN WORKING WITH INCLUDE

“Having finally seen Cortex in action, I can safely say these guys have something truly special on their hands, my only disagreement is that they should be based in Singapore!”

“Neuroware have been our ‘go to’ guys with respect to blockchains and critical in raising the understanding of distributed ledgers for our senior leadership teams and partners”

“Neuroware have consistently been our key consultants with regards to blockchain technology. Their participation provided us with use cases that weren’t first obvious”

Anson Zeal - CEO
Bitcoin Remittance Company

Amran Hassan
Head of Innovation

Max Tiong
Head of FinTech
