

The Blockchain Embassy of Asia

<http://bce.asia>

THE MISSION

- To educate organizations throughout Asia about both the technical and legal implications of the various forms of distributed ledgers available
- To provide neutral ground for various parties from multiple industries to work together with a shared goal and consolidated collection of code & results

CURRENT AMBASSADORS

Banking Ambassador

MahWengKwai
& Associates

Legal Ambassador

FinTech Ambassador

1337
VENTURES

Community Ambassador

Technology Ambassador

THE VISION

- To become a licensed and regulated business entity that is created and managed via blockchains with a focus on providing third-key solutions
- To help fuel the Asian blockchain community with the necessary resources it requires to be a global power-house in distributed ledger technology

THIRD-KEY SOLUTIONS?

- Multi-signature technology popularized and improved upon with extended functionality such as time locks and other smart contract properties is one of the most important components of this new distributed IT stack
- Using 2 of 3 signatures (for example) enables recovery and arbitration of accounts and transfers by splitting keys into multiple parts - but where to store the 3rd key?

SECURE SERVICES

Distributed Data Services

Shared Parsers & APIs
Shared Public Records
National Data Archives

Distributed Identity Services

Self-Managed Identities
Shared KYC Credentials
National Blockchains

Distributed Signing Services

Shared Ownership of 3rd Keys
Arbitration & Escrow Contracts
National Legal Protocols

PHASE ONE

- Our initial goal is to confirm a minimum of nine ambassadors to form the steering committee
- The steering committee will finalize the next steps and associated costs together utilizing our guide

STEERING GUIDELINES

- Create a blockchain-based CRM and CMS to manage the BCE membership and website content that utilizes multi-signature updates
- Agree upon the technical foundation and the embassy's first public event, along with all associated costs, length and terms of the second phase of milestones and membership conditions

THE FUTURE

- Create custom tokens to manage governance
- Crypto-currency based shared digital assets
- Customized agnostic ledgers for arbitrary data

SEEKING SUPPORT

- Currently seeking at least one ambassador from each of the following industries:
 - Insurance, Logistics and Telecommunications
- Also seeking event sponsors and media partners
