BLOCKCHAIN INFRASTRUCTURE PROVIDERS

THE PROLOGUE

WHAT ARE BLOCKCHAINS...?

BITCOIN

VS

BLOCKCHAINS

BLOCKCHAINS - THE FASTEST GROWING TECH OF OUR LIFETIME

In 2016 alone, over 100 banks and leading financial institutions started working on blockchain projects - with the eco-system receiving over US\$1 billion in funding

WHY THE FUSS...? WHAT DO BLOCKCHAINS DO...?

- They provide an **immutable** tamper-proof audit-trail of the truth
- Data can be easily **shared** and independently verified by third-parties
- Vastly increased security that is much less vulnerable to attack or outage
- Programmable contracts that can radically reduce human errors and costs

“While FinTech Disrupts Banks,
the Blockchains Disrupt FinTech”

AGNOSTIC PROTOCOLS PROVIDE COMPETITIVE ADVANTAGE

Although they are arguably very different due to their lack of data types (beyond 32 byte limited MD5 hashes - known as data anchoring), Factom and Tierion are our main competitors, but they are only servicing the US & European markets. No Asian competitors.

	FUNDING	DATA TYPES	DATA SOURCE	BLOCKCHAINS
FACTOM	US\$ 1.5M	1	1	1
TIERION	US\$ 1M	1	1	1
NEUROWARE	US\$200K	20*	3*	10*

* These are merely out-of-the-box support - since everything is either modular in nature or based upon protocols, they all have unlimited scopes

THIS ALLOWS US TO PROVIDE THE CORTEX OPERATING SYSTEM

The screenshot displays the Cortex Operating System interface. On the left, a vertical sidebar lists navigation options: CORTEX (selected), DASHBOARD, DOMAINS, USERS, DATABASES, API, EXPLORER, WALLET, and SETTINGS. The main content area has three main sections: 'YOUR PROFILE' (showing Name: Mark Smalley, Title: Co-Founder & CEO, Company: Neuoware), 'CURRENT USAGE' (listing Domains, Sub-Domains, User Accounts, Databases, Active Modules, and Active Protocols with progress bars), and 'RECENT ACTIVITY' (listing recent events such as updating a DNKey, adding new users, creating databases, and generating wallets). A top header bar includes links for dashboard, add domain, add user, add database, add api key, help, credits (11.00000000), flush, and logout.

PROBLEMS FACED BY ECF OPERATORS AND OUR SOLUTIONS

- Difficult to truly include as many retail investors as possible due to 50 limit
- Difficult to attract international investors due to current market sentiment
- Difficult to actually work in real-time due to offline financial trustee services and daily batch-based CSV transactions with other financial institutions
- Having worked with ATA-Plus now for several months, we've been able to:
 - Utilize the blockchains to store public data related to our campaign
 - Utilize the blockchains to provide an optional digital form of equity
 - Utilize the blockchains to develop an ECF loyalty reward platform
 - **World's 1st** fully licensed ECF campaign to accept crypto-currency

OTHER BRANDS WE HAVE BEEN WORKING WITH INCLUDE

“Having finally seen Cortex in action, I can safely say these guys have something truly special on their hands, my only disagreement is that they should be based in Singapore!”

“Neuroware have been our ‘go to’ guys with respect to blockchains and critical in raising the understanding of distributed ledgers for our senior leadership teams and partners”

“Neuroware have consistently been our key consultants with regards to blockchain technology. Their participation provided us with use cases that weren’t first obvious”
